Validity

This is a public document for the partners of Designwerk.

1 Preface

In the event of an emergency, it is essential, that the public emergency services quickly get to the information they need. It is mandatory that this information is present on every truck.

Since October 2022, stickers with a QR code have been placed on the cabs of Designwerk e-trucks.

2 Introduction

To ensure that vehicles that were previously placed on the market also have these stickers, this must be checked when working on a Designwerk e-truck.

If it is found that these stickers are missing, they can be obtained from Designwerk Aftersales.

2.1 Spare parts

One set contains 3 stickers with the necessary QR codes.

Article no.	Description
110270	QR codes for public emergency services Volvo V2.X
112729	QR codes for public emergency services LOW CAB

3 Application of the QR code

The QR code can be scanned using a QR code scanner within a reader, e.g. a mobile device.

One QR code is sufficient. All available languages are stored there.

The stored language of the mobile device automatically generates the correct output language of the document «Information for public emergency services».

3.1 Available languages

Information for public emergency services

Informationen für
Blaulichtorganisationen

Informations pour les secours
d'urgence

Informazioni per le organizzazioni
di primo intervento

The document «Information for public emergency services» is available in four languages.

- English Information for public emergency services
- Deutsch Informationen für Blaulichtorganisationen
- Français Informations pour les secours d'urgence
- Italiano Informazioni per le organizzazioni di primo intervento

The displayed language is selected via the operating system language of the device. If the language is not available, English is displayed.

4 Correct position of the QR code stickers for Volvo V2.X

The QR codes are placed on both door leaves. For high cabs, they are placed below the door latch. For low cabs, due to lack of space, they are placed above the door latch.

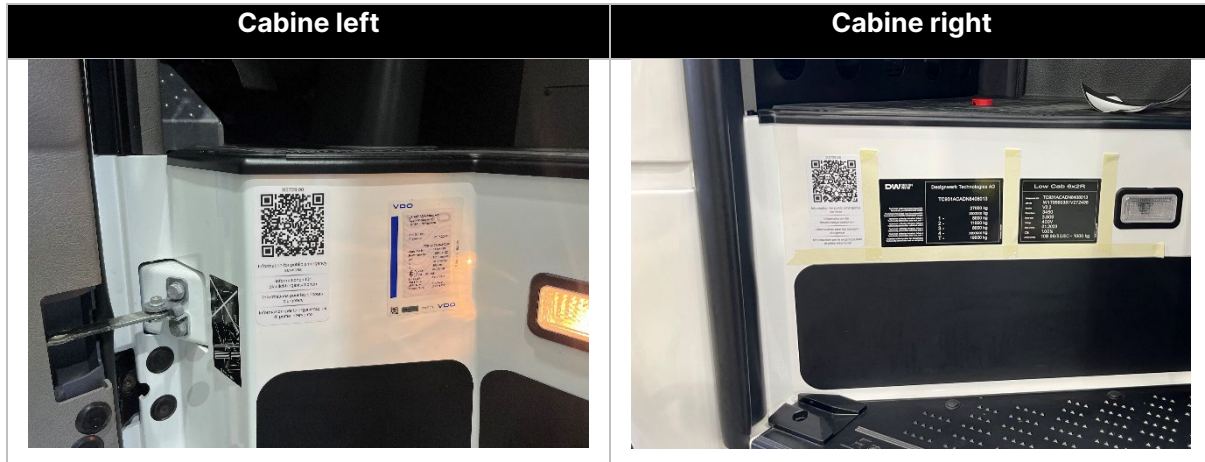

By attaching the codes to the door leaves they can also be read from a greater distance.

5 Correct position of the QR code stickers for the LOW CAB

The QR codes are placed on both door leaves.

By attaching the codes to the door leaves they can also be read from a greater distance.

6 Attaching the QR codes

- Make sure that the target location of the sticker is free from grease and lint. For this purpose, clean the surface with a cleaner containing alcohol.
- Detach the sticker from the underside.
- Position the sticker on the target location, so that no air bubbles are created.
